

A PERSONAL INTRODUCTION FROM YASEEN

One halal day trading system.

Personal support to execute it.

Thanks for taking a look.
First, here is how we trade halal.

How we trade halal

We follow AAOIFI Sharia standards.

01 We own the asset we buy

Actual company shares, not CFDs.

02 We do not use leverage

Our own cash buying power. No margin loans.

03 We only go long

We buy first, then sell. No short selling.

04 Only Sharia compliant stocks

We check the business and financials before buying.

[Click here for more details on how we trade that's halal.](#)

Apply for Stockilm

Short application first. A call if the fit is right.

MEMBER EXPERIENCES

Different starts. One clear process.

Hassan | Already profitable in Forex

He wanted an approach aligned with his faith. Hear his experience of the structure and community.

[Watch Hassan's full conversation](#)

DONIA | STARTING FROM ZERO

"Even that was explained very clearly and precisely which gave me a lot more confidence."

She was preparing for paper trading. Her feedback describes learning, not profits.

RIZWANA | AFTER TRYING OTHER COURSES

"The course material was so concise and easy to study."

Individual experiences, not typical financial results.

YOUR MENTORSHIP

More than knowing the strategy.

Learn why you are taking a trade, what makes it invalid, and when to do nothing.

My complete strategy

Filters, entries, risk and trade management, taught in one sequence from A to Z.

Four live sessions each week

See how I assess real markets, plan a trade and decide when to wait.

Weekly Q&A and trade breakdowns

Bring your questions. Understand the decisions behind entries, exits and mistakes.

Tools, community and discipline

Your Stockilm dashboard and Discord community, alongside Muslims learning the same skill.

Work towards profitable execution. Not a promise of income.

Apply for Stockilm

HOW I TRADE

Real shares. Cash buying power.

Long only. No CFDs or borrowed exposure. The company is screened before the chart.

01 Screen the company

Use Zoya, Musaffa or Muslim Xchange. My screening framework follows AAOIFI standards.

02 Build a focused watchlist

Scan for active stocks. Use AI to organise research, then verify the catalyst and tradability.

03 Wait for the conditions

Map higher timeframe levels. Look for strength above VWAP, then wait for the entry setup.

04 Plan the risk. Review the trade.

Define the stop, size and target before buying. Journal the decision, not just the result.

Explore the full strategy

Stockilm is not independently AAOIFI certified. Screening is not a personal fatwa; seek qualified advice about your account. AI is not a religious ruling.

PUT THE PROCESS INTO PRACTICE

Start with a plan you can explain.

Try this with a historical or paper trade. The first goal is clarity, not a rushed live entry.

01 Why this stock?

Write down the screening check, the catalyst and the setup you are waiting for.

02 Where is the idea wrong?

Identify what would invalidate the trade. Define the stop before thinking about the target.

03 What would you risk?

Work out the position size and cash required. Decide whether the trade fits your risk rules.

A winning trade can still break your rules. A losing trade can follow them.

Inside Stockilm, we work through the reasoning in live sessions, trade breakdowns and weekly Q&A.

THE SUPPORT IN PRACTICE

A routine you can actually review.

Scan and research. Plan the risk. Journal the decision.
Keep the process connected.

Dashboard example. Not a stock recommendation.

Bring the question. Understand the decision.

Record your decisions. Bring questions to Q&A. Learn
from full trade breakdowns.

Member experiences. Financial outcomes vary.

THE COMMITMENT

You bring the effort. I bring the support.

You can be new to trading. What matters is being willing to practise, follow a process and take feedback seriously.

MY THREE MONTH SUPPORT PROMISE

**Follow the system for three months.
If you are not profitable, I will
personally work with you on one to
one calls until you are.**

Continued coaching, subject to terms and participation requirements. This does not guarantee returns or reimburse trading losses.

[Read the terms and conditions](#)

Make an informed decision.

Discuss the price, access, schedule and participation requirements before joining. The mentorship fee and your trading capital are separate.

Do not trade with money needed for essentials.

YOUR NEXT STEP

Ready to learn it with support?

The next step is a conversation about you. Not a commitment to join.

01 Your starting point

Your experience, what you have tried and the problems you want help with.

02 How the support would fit

The training, the live sessions and what you would need to work on.

03 A clear decision

The price, time and practical commitment. Your questions before you decide.

For people ready to practise and take feedback seriously. Complete the application; suitable applicants are invited to book a call with me.
